UNIVERSITY AT BUFFALO PRESENTS:

EEH 100th Anniversary Symposium

EEH was first established in 1919 as the Department of Hygiene and Public Health. Since that time, while the focus of our teaching, research and service has changed with the changing needs of our communities, we have remained committed to understanding how best to prevent disease, deliver care, and teach researchers and practitioners in public health. We are very proud of the many major public health leaders who have been part of our department. This 100th celebration is an opportunity to understand and commemorate our history, and to look to the future, in a time of rapidly changing public health challenges.
